Our proven record of strong performance has allowed Greenspeed to safely implement hundreds of projects. We have audited, designed, and installed more than 100 million square feet of space for commercial and industrial customers throughout North America. We stay on the leading edge of emerging technologies, while delivering old fashioned service.

About Us

Greenspeed Energy delivers Sustainable Energy Solutions.

Our team's electrical experience has lead us to develop a turnkey approach to the implementation of technology for various sustainability goals. Whether the goal is to reduce utility and operating costs or for social improvement in a specific community we are committed to implementing the latest technology to deliver a meaningful ROI for Businesses Communities and the Environment.

We Provide Solutions For

INDUSTRIAL

Greenspeed has over 200 years collective electrical experience with an exceptional safety record. Our team understands the critical nature of industrial operations and works diligently with facility maintenance teams to minimize disruption to manufacturing & process activities. Proficient with hazardous location lighting, outage planning, and complex installations, Greenspeed helps its industrial customers achieve their goals of reducing energy and maintenance costs, improving working & safety conditions through better lighting, all while advancing performance and reducing downtime.

RETAIL

Whether it's a nationwide rollout of 300+ retail stores or a 1 million+ square foot distribution center, the Greenspeed team has you covered. Our vast experience working with retail energy and facilities management teams has made us experts in the planning and execution of retail projects. Our Zero-Complaint approach helps our retail customers through an efficient nationwide rollout process, minimizes disruption to store functionality, and multi-site rebate administration.

EDUCATION

Greenspeed has a long history of working with K-12 and higher education customers. Our team has designed and installed lighting efficiency upgrades in over 1,000 K-12 schools over the past 30 years providing solutions to meet lighting level requirements, design behavioral modification programs, completed district-wide rollouts of public schools and gymnasium upgrades to meet ESPN filming standards. Recently, Greenspeed worked diligently to minimize disruption to students and staff through scheduling for an entire university, with a medical school, dormitories, libraries, and auditoriums.

HEALTHCARE

With patient sensitivity in mind, Greenspeed's team understands the delicate nature of healthcare projects, whether it be a small rehabilitation facility or a large metropolitan hospital. Starting with a comprehensive audit, the Greenspeed team will work diligently with the facility's engineering team to design a project and implementation plan. Appropriate safety, dust-mitigation, and scheduling is crucial to a flawless installation, and Greenspeed helps its healthcare customers by focusing on these three tenants.

COMMERCIAL OFFICE

With experience in implementing IoT based sensors and controls, Greenspeed has the capability to apply the latest technologies for building owners to lower operating costs, while simultaneously collecting data that can be used to improve tenant comfort & maximize their use of space. We pride ourselves on designs that maximize value for building management while minimizing tenant disruption. Greenspeed's vast office experience ranges from small tenant improvements to a 2.1+ million square-foot Class A retrofit project.

GOVERNMENT

Greenspeed's government experience provides long-term value to our clients incorporating sustainable technology to provide safety improvements, improved user interfaces, and utility cost reduction. Through extensive experience with the federal, state, and local government projects, our team members have successfully implemented projects ranging from local USPS offices to large-scale military facilities.

HOSPITALITY

From small motels to full-service hotels & resorts, Greenspeed has one of the premiere resumes in the nation for hospitality projects. We have vast experience coordinating room retrofits with housekeeping & engineering personnel, ensuring dimming capability, and meeting the standards of the major brands in hospitality. Finally, we work diligently to enhance guest experience by minimizing public view of the work being performed.

INTERNET OF THINGS

Through various partnerships with Fortune 500 companies, Greenspeed has become the premier implementation partner for IoT and SmartCity projects. Our installations of IoT sensors improve the environment in which people interact with technology.
